

LEARNING OBJECTIVES

By the end of the course, participants will be able to:

1. Incorporate the best available evidence and technology into their care for patients with GI and liver diseases.
2. Minimize morbidity, mortality, and symptom burden from common GI and liver diseases
3. Individualize diagnostic and treatment approaches to special populations
4. Collaborate with an interdisciplinary team focused on GI and liver disease

To optimize care for patients with gastrointestinal (GI) and liver diseases, we can adopt a multi-faceted approach that incorporates evidence-based practices, technology, and collaboration among healthcare professionals.

TARGET AUDIENCE

This course is ideal for international and U.S.-based participants, including practicing gastroenterologists, surgical endoscopists, gastroenterology trainees, endoscopy nurses and technicians.

Continuing Medical Education

The American Society for Gastrointestinal Endoscopy (ASGE) is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

ASGE designates this enduring material for a maximum of 13.5 *AMA PRA Category 1 Credits*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

CONFLICT OF INTEREST DISCLOSURES

The American Society for Gastrointestinal Endoscopy (ASGE) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Conflict of Interest, Scientific Excellence and Neutrality: ASGE upholds the highest standards of scientific rigor, evidence-based content, and clinical relevance in its educational programs. Activities are developed by experts selected for their knowledge, teaching excellence, and impartiality. All planners and faculty disclose relevant financial relationships, which are reviewed and addressed under ASGE's Conflict of Interest policy to ensure integrity and objectivity.

Patient Privacy Assurance: ASGE complies with HIPAA regulations to protect patient privacy. Faculty must deidentify patient information in all educational materials and presentations.

Educational Competencies: ASGE programs align with ACGME and ABMS competencies, focusing on medical knowledge, practice-based learning, patient-centered care, and evidence-based practice.

Commitment to Learners: ASGE's CME portfolio enhances knowledge, skills, and professional performance, empowering learners to advance patient care and optimize procedural outcomes. Content aligns with standards recognized by the GI profession and ASGE guidelines, integrating clinical medicine and healthcare practices.
